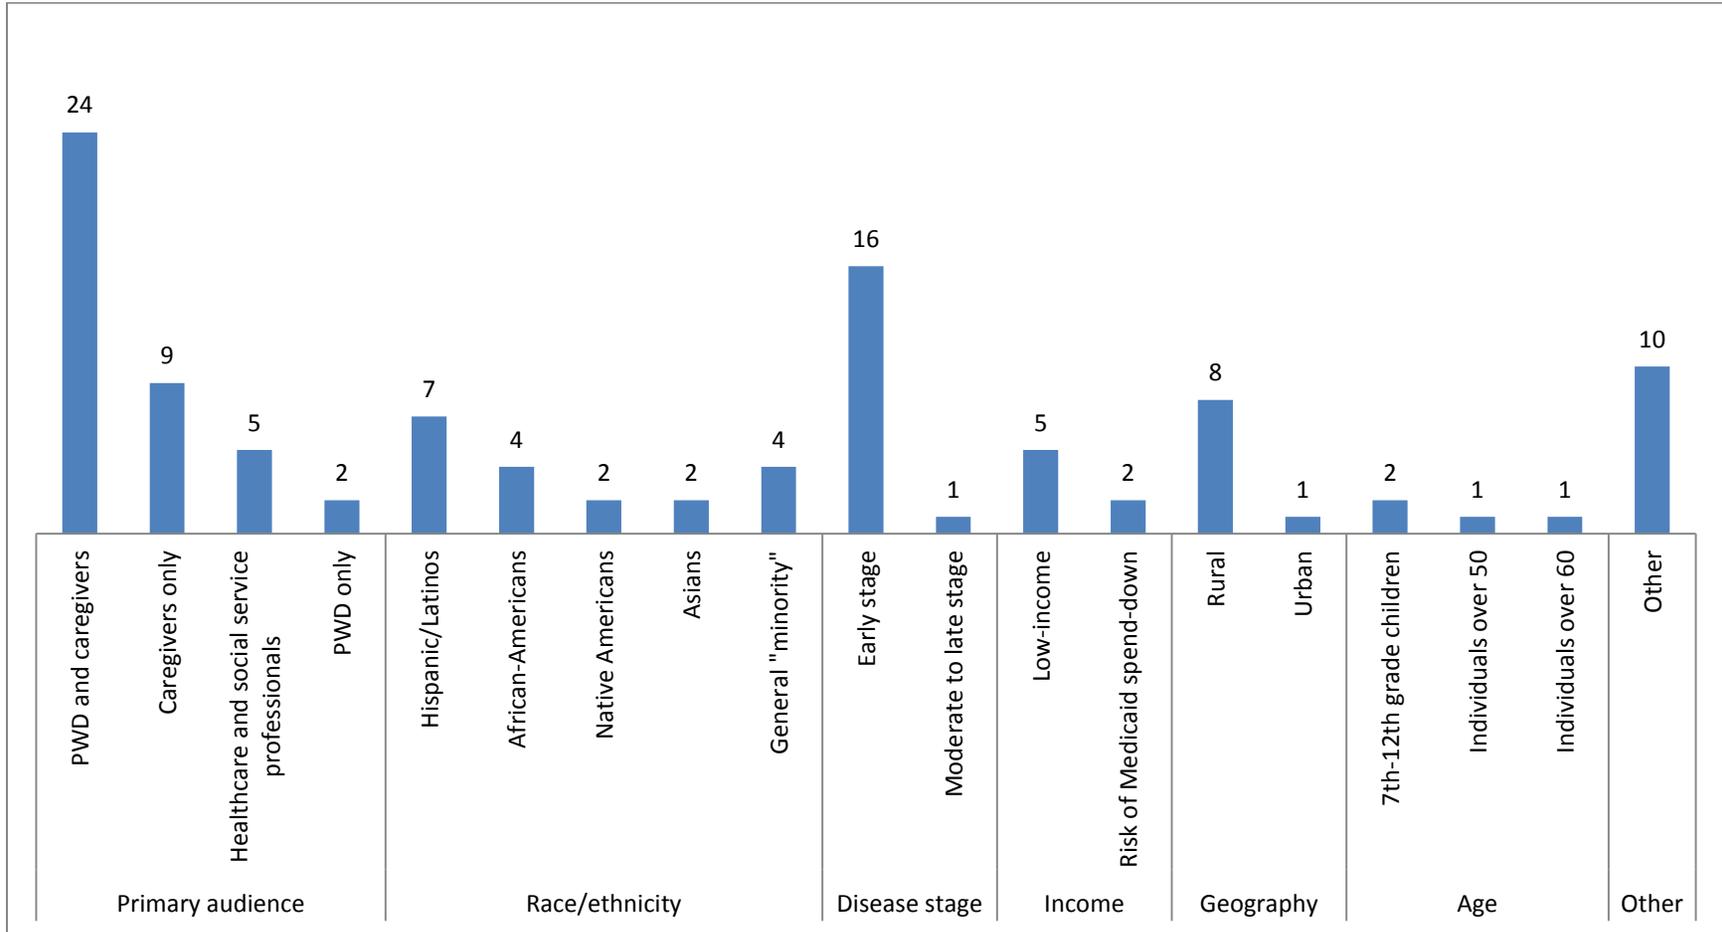

Exhibit 9 Completion Rate for Evidence-based Grants

Evidence-based ADSSP grants are required to provide data on the number of dyads enrolled and the number of those dyads that complete the intervention. The following chart shows completion rates for each grant within each type of intervention.

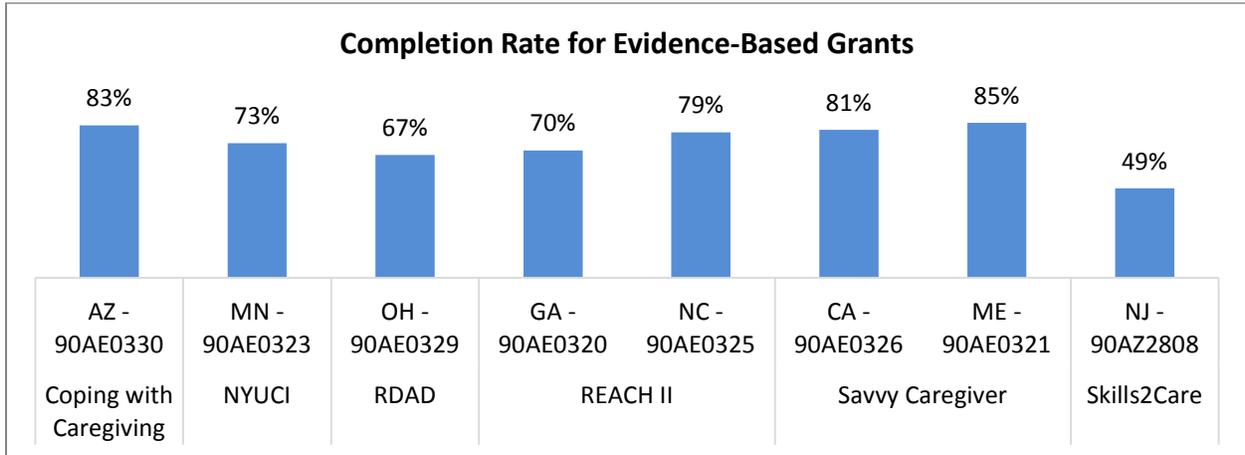

Exhibit 10 Outcomes by Grant

The following table displays the number of reported outcomes that achieved the threshold of statistical significance. 18 grants resulted in one or more statistically significant improvements in participant outcomes; 18 grants did not report any quantifiable changes in participant outcomes or did not report on statistical analysis; 3 were unclear; and 1 grant reported no improvement.
